

Technical Data Sheet:BR7037

Introduction	BR7037 is a 2F polyurethane acrylate resin. It features a fast curing speed, is free of HEMA and TMPTA monomers, has good toughness, and forms a transparent film. It has excellent adhesion to various substrates (such as PVC, PET, ABS, etc.) and is recommended for use on difficult-to-adhere substrates like methyl oil resin drop coating and PVC primer.	
Specification	Functionality(theoretical value)	2F
	Appearance (Visual inspection /25°C)	Clear liquid
	Viscosity(cps/60°C)	1000-2500
	Effective content(%)	100
	Color (APHA)	≤1
	*This data is for reference only. The product specifications to be followed shall be subject to the final released information.	
Characteristic	The resin cures quickly It doesn't contain HEMA and TMPTA Good toughness Film-forming permeability It has good adhesion to various substrates such as PVC, PET, ABS, etc	
Application	It is recommended for application on difficult-to-adhere substrates such as nail polish resin drops and PVC primers	
Packaging	20kg per drum 200kg per drum	
Storage	Resin should be stored in a properly sealed container at 5-45°C. Under these conditions, the storage stability of this product is 6 months.	
Safety and Cautions	1. Avoid contact with skin, eyes and clothing. Please wear protective gloves when operating. 2. In case of accidental contact with skin, eyes or clothing, please wash with soapy water (for eyes, rinse with plenty of water and seek medical attention). 3. For detailed instructions, please refer to the Material Safety Data Sheet (MSDS). 4. Each batch of goods must be inspected before being put into production.
